About BDS

The heavy-duty magnetic drilling machines with all features as well as reversible motor. Ideal for professional users in structural engineering & heavy engineering companies.

**TOP PERFORMANCE
IN A NEW DESIGN**

MAB 485 / 485 SB

The compact all-rounder. Wide range of possible applications and excellent performance make the MAB 485 / MAB 485 SB one of the most popular machines among metal-working professionals.

THE BESTSELLER AMONG PROFESSIONALS

For greater comfort and precision, there is the MAB 485 SB with a Swivel Base adjustment fixture. This makes centering of the hole to be drilled easier and quicker.

Video & Docs

Anyone who has ever worked with Swivel Base equipped machines from BDS will never wish to drill without it again. Swivel Base allows precise, accurate centering of the hole to be drilled without having to move the complete weight of the machine at the same time. Ideal for overhead and horizontal drilling situations.

FOR QUICKER AND SAFER WORK

The Swivel Base technology of BDS allows easy and precise movement of the drilling machine on the magnet. The machine can be swivelled by 20° to the left and right and be moved 15 mm forward and backward.

Precise centring is thus significantly easier. Swivel Base ensures greater comfort and safety particularly when working on a vertical surface or overhead.

Video & Docs

- 1.** Put the machine in roughly the right position.
- 2.** Switch on the magnet.
- 3.** Unlock adjustment device and effortlessly adjust machine precisely.
- 4.** Lock the adjustment device with the hand lever again, once the center of the hole is achieved.

MAB 825 / MAB 845

The classic among the large BDS magnetic core drilling machines. For core drilling up to Ø 100 mm and 110 mm cutting depth.

WELCOME TO THE TOP CLASS

MAB 845 equipped with Swivel Base

Entry to the top class with strong output and a high degree of flexibility. Suitable for twist drilling, reaming, countersink and tapping.

BDS Special Purpose Drilling Machines

WHAT IS NEEDED

IS SPECIALLY BUILT

BDS already has the correct machine in its range for the vast majority of applications. However, every now and then tasks crop up that cannot be completed optimally with existing technology. In such special cases, we develop customised special machines in small series or even as single pieces for our customers. We will be happy to create an individual solution for you. Here you can see three examples out of hundreds of solutions already delivered.

Do you have specific tasks that cannot be completed optimally with existing tools? Do not hesitate to ask us. We will be happy to provide you with advice with no obligation. You need it? We will build it!

MAB 525 with prism clamping system for machining pipes

The prism plates adjustable at the sides can be adapted to the pipe diameter and thus stabilise the core drilling unit against lateral twisting.

The magnetic retaining force of the magnetic core drilling machine now fixes the drilling unit to the pipe with the clamping system.

MAB 825 PS

Specially retooled MAB 825 magnetic core drilling machine with rail clamping system for precise fitted bores in special profiles with a drilling template.

MAB 825 W90

Small angular drilling machines can do lots of things. But in this particular case, the challenge was considerable. With a 90° clamping angle, BDS has solved the problem.

MAB 1300

Superior performance with exceptional power delivery.

THE STRONGEST OF THE STRONG!

Pure power! 2,300 W motor power, four speeds and a full package of features leave nothing to be desired. The MAB 1300 goes to the limit of magnetic core drill technology.

Full wave control electronics

Overheating protection

Oil bath gearbox

Variable speed & torque control

Power-Assist Servo Drilling

Morse Taper 4

Friction clutch

Clockwise/anticlockwise rotation

Magnet indicator

Permanent internal lubrication

Drilling of diameters up to 130 mm

Extra powerful 3 coil magnet

The MAB 1300 magnetic core drilling machine is currently the strongest magnetic core drilling machine available with a reversible motor. The appearance of these drills alone shows what they are about: Pure power! 2,300 W powerful motor, four-speed gear-box and a full package of features leave nothing to be desired. This magnetic core drilling machine meets all the requirements made by heavy-duty structure engineering, shipbuilding, and mechanical engineering. Core drilling capacity up to 130 mm diameter (30 mm cutting depth) is possible. The full range of the BDS core drills can thus be utilized to its full extent. As standard, the MAB 1300 has a direct arbor with a 32 mm Weldon shank. Without the solid steady, which can be removed very easily, the stroke of the drill increases to an impressive 310 mm. The MAB 1300 magnetic core drilling machine is also fully equipped with all the safety features of modern magnetic core drill technology. The premium feature of the MAB 1300 is the Power-Assist, servo-assisted drilling for effortless drilling, especially for larger diameters.

About BDS

The machine series for professional users who do not wish to compromise on quality or performance but can dispense with convenience and certain features.
Genuine BDS quality at an attractive price!

MABasic 200

No one needs to compromise on the BDS "Made in Germany" quality of workmanship. BDS delivers top performance even in the lower price bracket.

THE SMALL MACHINE WITH A LARGE IMPACT!

Who says that only big machines can do big things? The MABasic 200 proves the opposite. It will ensure that you are well equipped for professional use on site and in the workshop.

Switches are arranged on the back for safe and easy operation

MABasic 400

Sturdy and reliable 1,050 W motor with high speed.

THE FAST RUNNER

IDEAL FOR

TWIST DRILLS

The motor safety switch and magnet switch are positioned in the middle of the back of the machine on an anti-glare display. The MABasic 400 can thus be operated safely even during overhead work or when working on a vertical surface.

Switches are arranged on the back for safe and easy operation

Two-speed gearbox with high speed for twist drills

Permanent internal lubrication

Coolant tank mounted on the side

MABasic 400

Motor output	1050 W
Voltage	230 V/110 V AC, 50 – 60 Hz
Stroke	160 mm
Magnet dimensions	84 x 168 x 48 mm
Weight	12 kg
Direct arbor	19 mm Weldon (3/4")
Gear 1 range	430 rpm
Gear 2 range	760 rpm
Permanent internal lubrication	✓
MABasic 400 230 V

MABasic 450

Flexible working thanks to the MT 2 tool changing system.

WITH MT 2

CHANGING SYSTEM

With ample motor power of 1,150 W with a weight of just 13 kg, this is a portable and reliable workhorse in the workshop and on the assembly line. Drilling of diameters up to 40 mm / 50 mm with a cutting depth of 55 mm is possible.

Switches are arranged on the back for safe and easy operation

MABasic 850

Full power for demanding tasks. This machine will offer you an extremely powerful and reliable drilling solution with the BDS quality.

WITH 1800 W
SUITABLE FOR
EXTREME TASKS

Ample performance with a 1,800 Watt motor. Thanks to the 255 mm stroke, larger parts can also be machined with this magnetic core drilling machine. The MABasic 850 is designed for core drills with a diameter of up to 75 mm and length up to 110 mm. This is an ideal machine drilling twist drill bits up to 31.75 mm diameter with MT3 Shank.

ALWAYS THERE FOR YOU BEFORE AND AFTER A PURCHASE

WORRY TAKEN OUT OF EVERYTHING THANKS TO BDS PREMIUM SERVICE

Machine check-up

This will help you keep your magnetic core drilling machines in top form! BDS will check your machine, check all the functions and recommend the solution that represents the best value for money if repairs need to be carried out. The scope of a BDS machine check-up comprises the following:

- ▶ Dismantling and cleaning
- ▶ Check of connectors, switches and wires
- ▶ Replacement of wear parts such as spindles, steadies, guide rails and carbon brushes
- ▶ Anchors, coils, PCBs and magnets are checked and, if necessary, replaced following the issue of a quotation

Grinding service

Sharpening BDS core drills will reduce your tool costs. BDS core drills from the HSS-Co 8 and HSS-Standard series are designed so that multiple regrinding is possible without loss of quality. Use our professional regrinding service with ORIGINAL BDS grinding geometry. Do you want to sharpen yourself? Instructions are enclosed with every drill package and are available for downloading in the downloads section of our website.

Individual consultancy

Do you have any questions about magnetic core drilling technology? Do you want to know which machine is the right one for your requirements? Will be pleased to provide you with specific advice! Contact our head office in Mönchengladbach. You will be put in touch with the relevant expert or be given a call back. We look forward to your call or email.

About BDS

AutoMAB 350 / AutoMAB 450

Magnetic core drilling machines with fully automatic feed and return.

ECONOMICAL

FULLY AUTOMATIC

DRILLING SOLUTION

Integrated coolant tank

Overload protection

LED switch

Magnet indicator

Permanent internal lubrication

Features and function of control are identical for both AutoMAB units!

- ▶ The control reliably monitors the drilling process, while the power consumption is displayed by means of an LED
- ▶ A safety cut-out protects the drilling motor from overload
- ▶ Safety control cut-out: If the magnet loses its adhesion, the drilling and feed motors automatically cut out

- ▶ The high degree of uniformity in the drilling process protects the tool and machine and significantly reduces the risk of the core drill breaking
- ▶ The automatic feed is activated by one of the three handles

About BDS

MAB 825 V / MAB 845 V

Full performance and flexibility for steel, plant and machinery construction.
With controllable automatic feed.

THE HEAVY-DUTY AUTOMATIC MAGNETIC DRILL

Torque control

Magnet indicator

Permanent internal lubrication

Swivel Base adjustment device (More information on page 9)

- The automatic feed is activated and deactivated at the hub and can be switched on in any position
- The variable feed speed ensures optimum use of the respective tool
- The feed is automatically disabled when the top or bottom end position is reached

- Further machining is possible at any time by means of manual reversing
- Safety control cut-out: If the magnet loses its adhesion, the drilling and feed motors automatically cut out
- The machine can also be used with manual feed

Drill stands and clamping devices

Magnetic drill stand for conventional twist drilling machines and MobilCLAMP for magnetic drilling machines.

EXPAND THE POSSIBILITIES OFFERED BY YOUR MACHINES

Magnetic drill stand

Magnetic drill stand for manual drilling machines

With this practical magnetic drill stand, you can turn your manual drilling machine into a magnetic drilling machine.

The magnetic drill stand is suitable for commercially available manual drilling machines with 43 mm collar diameter.

The powerful magnet therefore allows safe work on a horizontal plane or overhead work (a safety lashing strap must also be used for these applications). The slide has a working stroke of 180 mm.

Magnetic drill stand
ORDER NO.
MBS 300
For commercially available manual drilling machines with 43 mm collar diameter, Stroke 180 mm

MobilCLAMP – mobile work with magnetic core drilling machines

MobilCLAMP for magnetic core drilling machines

The MobilCLAMP mobile clamping device has allowed the scope of application of a magnetic core drilling machine to be extended to the assembly line and workshop. To this end, the magnetic core drilling machine is placed on the supporting surface and switched on. Components can be securely

clamped in the prism vice, and without having to expend a lot of effort you immediately have a flexible bench drilling machine.

About BDS

Carry case

For magnetic core drilling machines.

EXTREMELY ROBUST YET LIGHTWEIGHT

- ▶ Portable – low weight coupled with high stability.
- ▶ Firmly locked – secure, large mechanical locks.
- ▶ Rolling instead of carrying – ABS wheels and telescopic handle.

Hard-top case	
ORDER NO.	SUITABLE FOR
ZHK 100	MAB 100K - MAB 155PRO
ZHK 350	AutoMAB 350, AutoMAB 450
ZHK 400	MAB 455, MAB 465, MAB 485, MAB 525 incl. SB series
ZHK 800	MABasic 850

Application: Carry case for BDS magnetic core drilling machines.

Design: Sturdy hard shell case with handle and secure locks.
With foam insert. No content.

Carry case	
ORDER NO.	SUITABLE FOR
ZPK 200	MABasic 200, 400, 450

Carry case on wheels	
ORDER NO.	SUITABLE FOR
ZHK 825	MAB 825, MAB 845

Application: Carry case on wheels for BDS magnetic core drilling machines.

Design: Sturdy transport case on wheels with handle and secure locks.
No content.

Carry case on wheels	
ORDER NO.	SUITABLE FOR
ZHK 1300	MAB 1300
ZHK 1500	MAB 825 V/845 V/1300 V, MAB 825 KTS

Application: Carry case on wheels for BDS magnetic core drilling machines

Design: Sturdy transport case on wheels with handle and secure locks.
No content.

BDS carry case for MAB 825/845.
Machine not included in delivery!

Thread cutting systems

For magnetic core drilling machines of the ProfiPLUS category.

DRILLING, COUNTERSINKING AND CUTTING QUICK AND SAFE

Quick-change drill chucks and inserts for threads from M6 to M42

Magnetic core drilling machines of the ProfiPLUS category are ideal for thread cutting.

The basic requirements for this are: Clockwise/anticlockwise rotation, solid shaft control electronics and high motor output.

Quick-change drill chucks

Sizes MT 2, MT 3 and MT 4

The large stroke range of the BDS magnet core drilling machines combined with the quick-change drill chuck allows quick and efficient working without having to realign and centre after changing tools. The quick-change drill chuck is designed for universal use when using quick-change inserts with and without a safety friction clutch.

Version 1: Quick-change inserts with safety friction clutch

Thread from M6 to M42 –

BDS inserts with a safety friction clutch allow precise cutting of through-hole and blind-hole threads.

The safety friction clutch prevents the machine screw tap hitting the floor of the drill hole and shearing.

Version 2: Standard quick-change inserts

Threads from M6 to M30 – BDS inserts for machine screw taps are suitable for accommodating machine screw taps for through-hole threads.

Which machine, which thread?

Assignment of possible thread diameter to size of quick-change base holders and inserts.

PowerCLEANER starter kit

Save money with the BDS starter kit at the bargain price!

Start with the right basic equipment for every magnetic core drilling machine. In a pack at a particularly good price.

- ▶ 5 short core drills in the most common diameters: 14 mm, 18 mm and 22 mm.
- ▶ 1 litre of BDS 5000 high-performance cutting oil.
- ▶ And a BDS PowerWORKER or BDS PowerCLEANER.

BDS PowerCLEANER starter kit

About BDS

High-performance cutting oil **BDS 5000**

Cooling lubricant concentrate **BDS 6000**

Purely vegetable oil that does not come under the category of hazardous goods in terms of customs & transport regulations.

The raw materials used are not listed in the Catalogue of Substances Hazardous to Water.

BDS 5000 is not subject to any labelling requirements.

- ▶ Biological raw material with additives
- ▶ Water hazard level 1
- ▶ Biodegradable, optimum basic adjustment of viscosity for use of BDS core drills, problem-free use for subsequent tin plating

For high standards based on synthetic raw materials

- ▶ Can be mixed with water, biologically stable and mild in odour
- ▶ Extends the service life of the core drill
- ▶ Toxicologically harmless, Water Hazard Class 1

Cutting Oil (For HSS Core Drills)		
ORDER NO.	NAME	CONTENT

Cutting oil, lubrication spray, cutting paste and cooling lubricant

High-performance products that can be used effectively and in an ecologically sound manner.

BEST RESULTS

KIND ON

THE ENVIRONMENT

High-performance lubrication spray **BDS 5200**

For working in awkward positions (overhead and on a horizontal plane), also suitable for high-alloy materials. Foam-like spray with very high adhesive strength.

Advantages: Precise dosing of lubrication spray and therefore optimum lubrication directly on the cutting edges. No dripping or splashing, thus ensuring maximum safety when working on ladders and scaffolds.

- White adhesive lubricant containing PTFE with corrosion protection
- Free from PCB, PCT, CFCs and chlorine
- Active substance: Mineral-based lithium grease with additives and solvents
- Compressed gas: Propane/butane, subject to labelling requirements

High-performance cutting paste **BDS 5500**

High-Tech metal-free cutting paste **BDS 7500**

BDS 5500: Ideal for material types that are hard to machine.

Suitable for use overhead and work in awkward positions.

BDS 7500: Base oil: Medicinal white oil. Extremely high heat resistance up to 1,400°C. For manual lubrication of high-alloy steel, Hardox steel and stainless and heat-resistant steel. For extremely high standards.

BDS high-performance lubricants and cleaning spray are tailored precisely to the respective intended purpose. The highly efficient composition allows sparing and environmentally friendly use.

The following are particularly recommended: BDS high-performance cutting oil or high-performance cooling lubricant concentrate. These products are fully biologically degradable and toxicologically harmless. However, also highly effective in the required lubrication and cooling performance. The BDS 6000 concentrate can also be mixed with water in a ratio of 1:10 and is therefore extremely efficient.

Caution: Please do not use liquid lubricants for overhead work or work on vertical surface. There is a risk that oil will get into the motor, thus causing a short-circuit. Please use BDS high-performance lubrication spray BDS 5200 or the BDS 5500/7500 cutting paste.

Step 1: Prior to drilling, spray high-performance lubrication spray directly into the drill.

Step 2: During drilling, spray high-performance lubrication spray onto the tip of the drill and into the borehole.

Lubricants and adjuvants

ORDER NO.	NAME	CONTENT
ZHS 550	BDS 5500 cutting paste	1000 g can
ZHS 570	BDS 7500 cutting paste	85 g tube

Clamping device for pipes with a diameter of 80 mm to 500 mm

The BDS pipe clamping devices are as standard suitable for pipes with a diameter of 80 mm to 500 mm. Flexible and quick clamping is possible in every drilling situation. Tension chains fix the clamping device to the pipe with swivelling prisms. Adjustment of the drilling position to the pipe is easy and safe. These devices significantly expand the range of possible applications of the ProfiPLUS magnetic core drilling machines.

The range of BDS fully ground core drills.

HSS-Co 8 series

- ▶ High degree of heat resistance
- ▶ Better wear protection
- ▶ High cobalt content of 8%
- ▶ Suitable for higher loads in fine-grained steels and rustproof materials
- ▶ With 19 mm or 32 mm Weldon shank
- ▶ Can be resharpened

HSS-VarioPLUS series

- ▶ High-strength fully ground core drill
- ▶ Carbide coating in a range of 2.5 µ
- ▶ Longer service lives
- ▶ More uniform discharge of chips, particularly during prolonged drilling – a key point for safety during work

HSS-Standard series

- ▶ Tools with three different cutting depths: 30 mm, 55 mm and 110 mm
- ▶ Core drilling diameters of 12 mm to 130 mm
- ▶ Can be resharpened

HSS-Co 8 series

Core drills made from special steel with high cobalt content, for increased heat resistance and wear protection.

HSS-Co 8 series	
KBK-CO	KBL-CO
Cutting depth: 30 mm	55 mm
Drilling diameter: 12 – 130 mm	12 – 100 mm

HSS-VarioPLUS series

Fully ground core drills made from high-performance high-speed steel, with carbide coating, high degree of protection against wear, excellent discharge of chips.

HSS-VarioPLUS series	
KBK-VP	KBL-VP
Cutting depth: 30 mm	55 mm
Drilling diameter: 12 – 60 mm	12 – 60 mm

HSS-Standard series

Fully ground core drill made from high-performance high-speed steel

HSS-Standard series

Cutting depth: 30 mm	55 mm	110 mm	30 mm
Drilling diameter: 12 – 60 mm	12 – 60 mm	20 – 50 mm	1/2" - 2 1/16"

Professional quality for professional tasks.

BDS core drills are produced on modern CNC-controlled grinding centres. This guarantees uniform cutting, quality and cutting performance of all BDS drilling tools across the entire range.

A large range of diameters and cutting depths

BDS core drills are produced in five cutting depths of 30, 35, 55, 75 and 110 mm and with more than 94 different drilling diameters.

Arbors

BDS core drilling tools are offered with different arbors.

They fit the KEYLESS quick-change drilling system and the MT 2, MT 3 and MT 4 industrial arbors also available in the range of accessories with automatic or manual internal lubrication.

- Arbors:
- ① 19 mm Weldon shank (3/4")
 - ② 32 mm Weldon shank (1 1/4")
 - ③ 18 mm Quick-In shank
 - ④ Carbide TCT annular cutters optionally available in Universal shank (Nitto+Weldon)

Carbide series and Carbide-PLUS series

- Carbide-tipped core drills
- Cutting depths of 30 mm, 55 mm, 75 mm and 110 mm
- Diameters of 12 mm to 150 mm
- Carbide-PLUS also with wear-resistant hard coating up to 2.5 µ

Carbide series

Carbide-tipped core drills. For machining stainless steel and non-ferrous metals, we recommend our BDS 6000 high-performance cooling lubricant concentrate.

Carbide series

HKK	HKL	HKX-L	HKE-L
30 mm	55 mm	75 mm	110 mm
12 – 150 mm	12 – 100 mm	18 – 120 mm	20 – 120 mm

Carbide-PLUS series

Carbide-tipped core drills with carbide coating.

Carbide-PLUS series

HKK-P
30 mm
12 – 60 mm

Carbide-RAIL series

Carbide-tipped core drills for rail core drilling machines.

Carbide-RAIL series

HKK-R
30 mm
17 – 36 mm

Quick-In series

HSS-Co 8-F/carbide

Core drills made from HSS tool steel or carbide-tipped. Suitable for Quick-In arbor systems.

Quick-In series

KBK-CO 8 F	HKK-F
35 mm	35 mm
12 – 60 mm	12 – 60 mm

HSS-CO 8 CORE DRILL SERIES

The drills from this series have outstanding heat resistance and wear protection. In combination with speed-controlled BDS magnetic core drilling machines, they are suitable for machining fine-grained steels and rustproof materials. BDS recommends the BDS 5000 cutting oil for machining stainless steel.

HSS-VARIOPLUS CORE DRILL SERIES

Fully ground core drills made from high-performance high-speed steel with carbide coating. High economic efficiency due to longer service life, greater safety during work thanks to excellent discharge of chips, particularly for long core drills. BDS recommends the BDS 5000 high-performance cutting oil.

HSS-STANDARD CORE DRILL SERIES

The basic core drill range for professional use. Fully ground core drill made from high-performance high-speed steel on CNC-controlled grinding centres, with good discharge of chips. Drilling with minimal effort. For working on a horizontal plane, BDS recommends the BDS 5200 high-performance lubrication spray.

Quality features that make the difference.

Grinding the end teeth

Modern CNC-controlled grinding centres ensure consistent quality.

Perfect cylindrical grinding

Maximum concentricity and a high degree of dimensional stability are guaranteed by the latest generation of cylindrical grinding machines.

From the first to the last cut!

HSS-Co 8%, HSS-VarioPLUS and HSS-BDS fully ground core drills

Unprocessed round bar

Mechanically processed

Hardened

Ground to external dimension

Ground with flute and end tooth

Coated VarioPLUS core drills

Manufacture of chip flute

Optimised work processes and quick loading operations with loading robots speed up the work process.

VarioPLUS coating

The VarioPLUS developed for BDS provides an additional protective layer on the tools. A hard coating provides a high degree of heat resistance and increased hardness of the coating.

The best raw materials

Böhler high-performance tool steel ensures continuous quality of the highest standard.

Scan the QR Code to watch our core drills production in Germany

CARBIDE CORE DRILL SERIES

BDS carbide-tipped core drills. Series with cutting depths of 30 mm, 35 mm, 55 mm, 75 mm and 110 mm and almost stepless graduations of the diameter from Ø 12 mm to Ø 150 mm. BDS recommends the BDS 6000 high-performance cooling lubricant concentrate for machining stainless steel and non-ferrous metals.

MAGNETIC CORE DRILLING TECHNOLOGY

FROM BDS

WORLD CLASS QUALITY

BDS company headquarters and manufacturing in Mönchengladbach

CNC-controlled core drill manufacturing

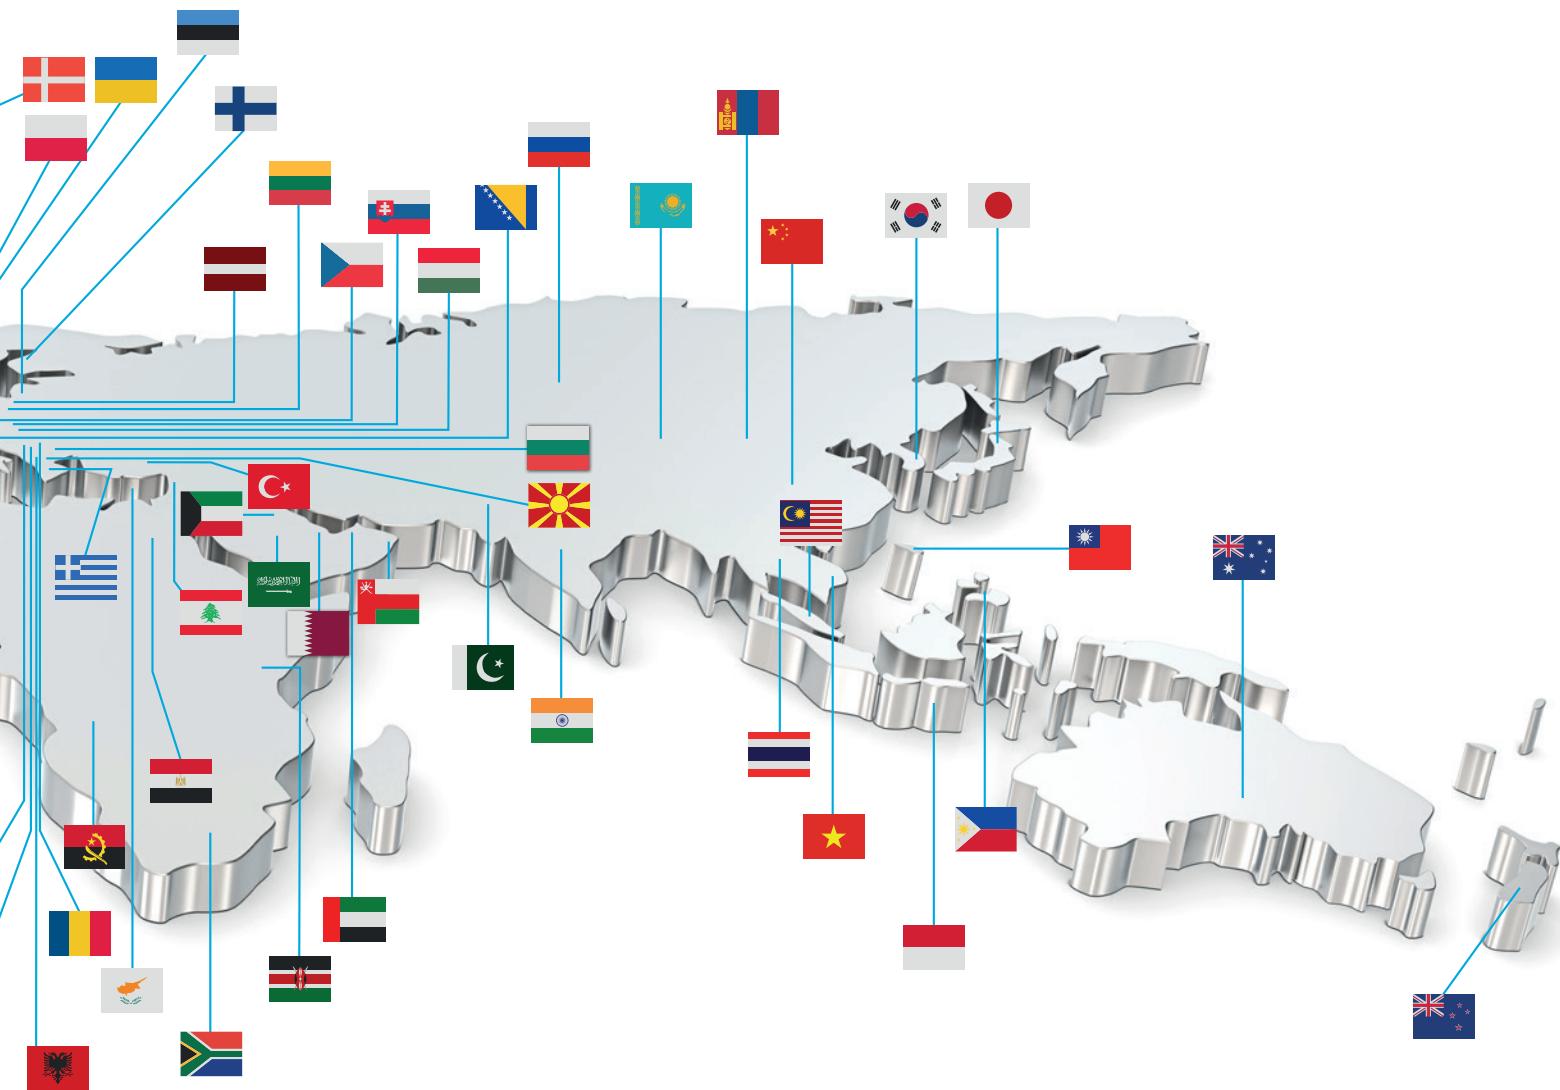

Our claim: Precision from design to manufacturing, best possible material, first-class service.

**BDSMASCHINEN
MADE IN GERMANY**

A good reputation doesn't just happen – it has to be worked at. This is what BDS has done: Since the company was founded in 1989, we have been producing magnetic core drill machines, core drills made from high-quality steel grades, beveling machines for preparing edges and chamfering and deburring machines for the metalworking

industry. And we have done this to such a high standard of quality that there is now worldwide demand for BDS products and they are used across the world.

BDS is the reliable partner to industry, trade and specialist retailers. All over the world.

Sharpening BDS core drills

Machine assembly hall in the Mönchnehlbad, Germany plant

DESIGNED & DEVELOPED
